

escea^{DS} Designer SERIES

The Designer Series is a sophisticated complement to the existing Escea range. While the standard range from Escea offers cutting edge style and design there is always a small sophisticated group who want a still sharper cleaner more exclusive design. Always keen to push the boundaries we wanted something extra special, the answer; take the Escea world leading fireplace and add a special team of designers charged with designing a range of limited editions fronts - the result; the Escea 'Designer Series'.

When you are looking for something that says I care about style and good looks in my home the Designer Series is the answer. With this collection, you get the best technical support available, through the Escea service network, while the style and flair of the Designer Series really does tell your friends who you are, and what is important to you.

THE *Designer* SERIES

SQUARE

The elegantly designed Square front sits out from the wall giving the appearance of a floating fireplace while the clean edges and sharp lines provide a strong sophisticated feature to be the focus of your room.

Colour Options: Satin Black, Metallic Silver

IB SERIES

The inset front fits right into your fire surround, and provides a completely flush, minimalist profile. This allows you to exercise your creativity to create a focus point in your room by selecting exotic wall materials. Potential choices for your surrounds range from traditional materials such as Italian marble or old English Oak, to modern materials such as concrete or glass.

COLLECTION

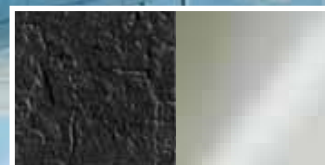

The Escea IB series fires are renowned for their high heat output and advanced technical features. The Designer Series offers two exciting new fronts for this range of fires. This range of fronts is available in either Silver or Black.

THE *Designer* SERIES

Stainless Steel with Stone Insert

EF5000

The Designer Series front for the Escea outdoor fire features a high grade stainless steel front with stone inserts top and bottom that can be customised in colour or texture to suit any outdoor setting. The contrast of high tech stainless steel and nature's finest stone provides a dramatic focal point to your outdoor entertaining area. Choose your stone inserts from the range provided by Escea, or provide your own to match your existing stonework.
